📊 PEOPLE ANALYTICS · OCT 2026

Hiring signals before they become hiring problems.

A data analysis of live job postings across 20 German tech scale-ups.

Which roles are hardest to fill — and which ones are next.

🔍 THE QUESTION THIS ANSWERS

Which engineering, product, data and GTM roles in German tech are approaching the 90-day hard-to-fill threshold — and how much runway is left before they cross it?

Benchmark: **168 days** · avg vacancy duration, all occupations
Source: Bundesagentur für Arbeit, Blickpunkt Arbeitsmarkt, Dec 2024

🏢 **20** companies tracked

📋 **495** classified roles

📅 **Oct '26** snapshot date

⚠️ WHY THIS MATTERS

German tech hiring takes longer than people admit.

The national average for a closed vacancy is 168 days. Most teams don't track role age at all.

By the time a role feels hard to fill, it's already past the threshold.

role families tracked

🔴 THE COST OF NOT KNOWING

01 **Role ages past 90 days.**
Candidates disengage. JD rewrites begin.

02 **Team ships slower.**
Backlog grows. Hiring manager loses confidence.

03 **Agency called at 150+ days.**
Premium paid. Signal missed entirely.

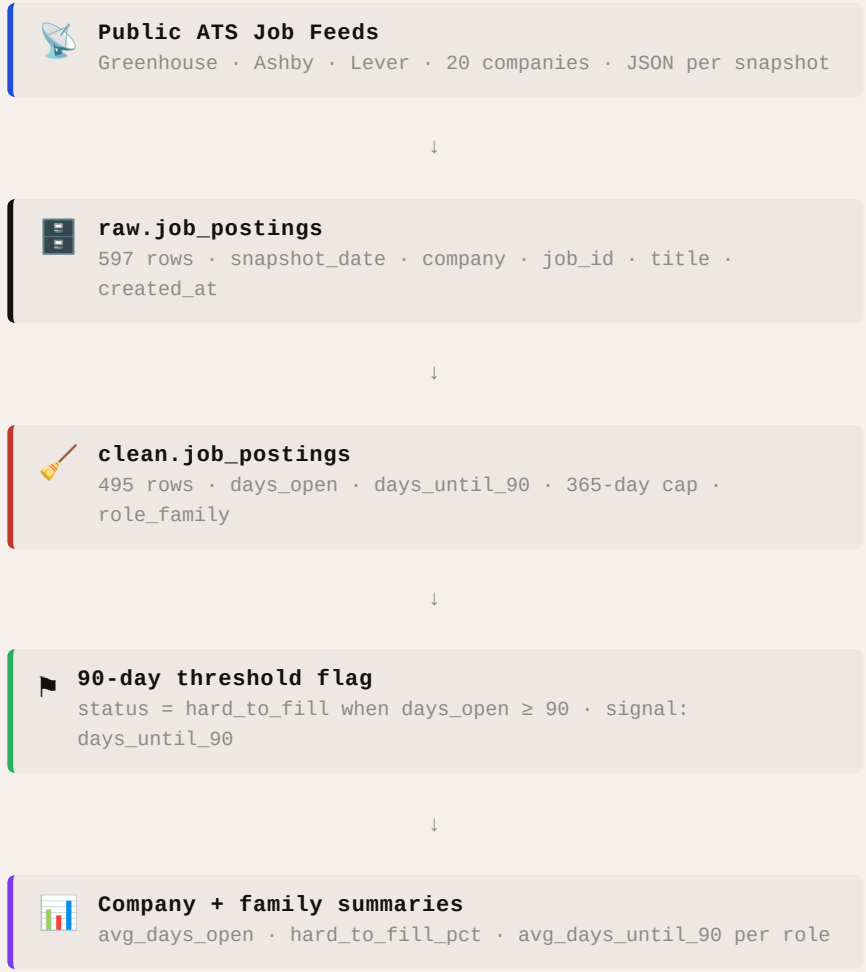

⚙️ WHAT I BUILT

Live feeds. Clean data. One signal per role.

Pulled directly from public ATS job feeds — no scraping, no manual data entry.

Every role classified by family. One signal: days until 90.

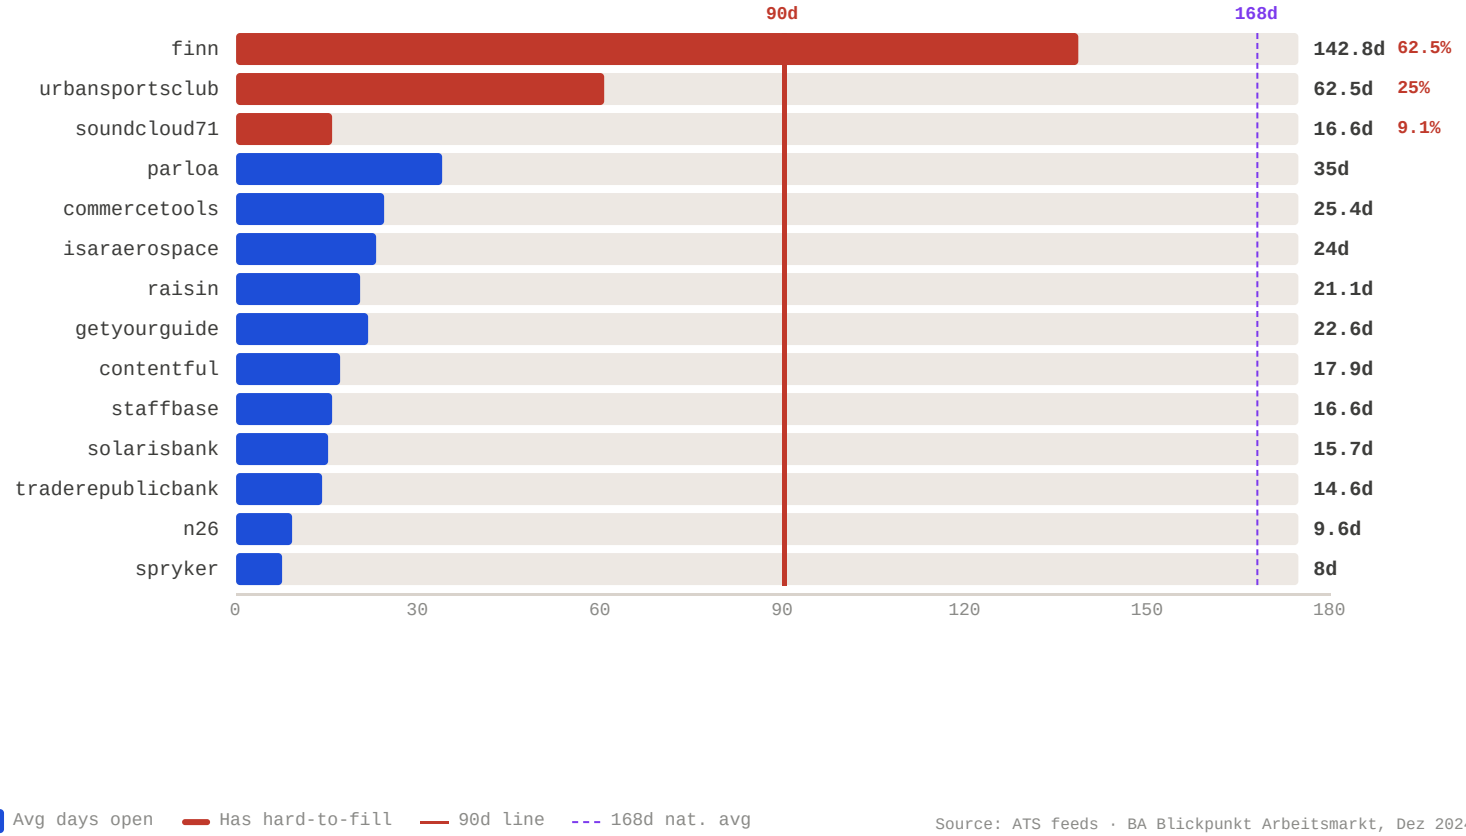

📡 Platforms: Greenhouse · Ashby · Lever
📅 Snapshot: 2026-10-15 · n = 597 raw rows
✅ Classified: 495 roles · 4 families · 14 companies

📊 AVG DAYS OPEN PER COMPANY

How long are roles sitting open?

n = 257 roles · 14 companies
capped at 365 days · classified only

Source: ATS feeds · BA Blickpunkt Arbeitsmarkt, Dez 2024

⚑ WHICH FAMILIES ARE CLOSEST TO THE LINE?

Role families by days until 90.

Active roles only for "days until 90"
Benchmark: 168d avg (BA, Dec 2024)

DATA

51.2d
avg days open · 11 roles

9.1%
hard-to-fill · 1 roles

Active roles avg **66.5d** from threshold

PRODUCT

29.5d
avg days open · 13 roles

7.7%
hard-to-fill · 1 roles

Active roles avg **71.6d** from threshold

GTM

27.3d
avg days open · 78 roles

2.6%
hard-to-fill · 2 roles

Active roles avg **67.3d** from threshold

ENGINEERING

23.9d
avg days open · 155 roles

1.9%
hard-to-fill · 3 roles

Active roles avg **67.8d** from threshold

Purple bar = progress toward 90-day threshold · Hard-to-fill % includes roles already past threshold

🔍 HONEST ABOUT THE EDGES

What this analysis can't tell you.

Single-snapshot analysis.
More snapshots = stronger signal.
Weekly tracking is ongoing.

⚡ **Platform sample bias**
Sample leans towards companies on US-hosted platforms (Greenhouse, Lever, Ashby). Personio and Greenhouse EU feeds block automated access — those companies excluded.

⏱️ **Days open ≠ time-to-fill**
How long a role has been posted stands in for time-to-fill. A role may have a strong internal pipeline while still appearing open externally.

✅ **Core finding holds**
Oldest roles at finn (143d avg) and Urban Sports Club cross the 90d threshold even under conservative assumptions.

📷 **One snapshot can't show closure**
Roles filled and reposted look like new openings. Roles closed without being updated still appear active. Weekly tracking resolves this over 4–6 snapshots.

👤 THE ANALYST

Tarif Hassan

People analytics professional.
Reinventing HR with AI & Analytics.

Built this analysis to understand where German tech hiring is under pressure — before the pressure shows.

Not a recruiter. Not selling anything. Open to a 20-minute conversation if this data is useful to your team.

🗺️ WHAT'S NEXT

01 **Weekly snapshots.**
Building a posting history to show which roles are aging — not just how old they are today.

02 **More companies.**
Expanding to 40 scale-ups as platform access allows.

03 **Open to feedback.**
If you work in People at a German tech company and have 20 minutes — I'd value your read on this.
