PEOPLE ANALYTICS · GERMANY · OCT 2026

Hiring signals before they become hiring problems.

A data analysis of live job postings across German tech scale-ups. Which roles are hardest to fill — and which ones are next.

252	12	90d	51d
IN-SCOPE ROLES	COMPANIES	THRESHOLD	COHORT P90

github.com/tarifhassan27/hiring-signal-germany · Snapshot: 2026-10-15

German tech hiring takes longer than people admit.

The signal comes early. Most teams don't look for it until it's too late.

A role at 90 days is past the 90th percentile.

THEN

Team ships slower

Backlog grows. Hiring manager loses confidence. JD rewrites begin.

THEN

Agency called at 150+ days

Premium cost. The signal was already there weeks earlier.

THE FIX

Track posting age now

The creation date is public. The threshold is measurable. p90 = 51d across 252 roles.

Live feeds. Clean data. One signal per role.

Pulled directly from public ATS feeds — Greenhouse, Ashby, Lever. No scraping. Every role classified by family from job title.

1	`ATS feeds`	Public JSON endpoints · Greenhouse · Ashby · Lever · German tech scale-ups only
2	`raw.job_postings`	**597 rows** · snapshot_date · company · job_id · title · created_at
3	`clean.job_postings`	**495 rows** within 365-day cap · days_open calculated · days_until_90 · role_family classified from title
4	`n≥5 filter`	257 classified roles across 14 companies → n≥5 per company → **252 roles · 12 companies** in the chart Final cohort
5	`90-day flag`	status = **hard_to_fill** when days_open ≥ 90 · threshold calibrated: p90 posting age = 51d across cohort

Avg days open · per company.

n = 252 roles · 12 companies · classified roles only · companies anonymised · scale: 0–160d

TWO OUTLIERS

Company A (142.8d) is deeply past the threshold. Company B: HTF badge reflects a single qualifying role pulling the avg up. 10 of 12 companies sit below 35 days.

Which families are closest to the line?

Avg days open by role family · n = 257 across 14 companies (pre n≥5 filter) · active roles only for runway

DATA
Highest avg days open

51.2d
avg days open · 11 roles

1 hard-to-fill role
9.1% of family

ACTIVE ROLES · AVG RUNWAY

66.5d until threshold

PRODUCT
Highest HTF rate

29.5d
avg days open · 13 roles

1 hard-to-fill role
7.7% of family

ACTIVE ROLES · AVG RUNWAY

71.6d until threshold

GTM
Sales · Marketing · Growth

27.3d
avg days open · 78 roles

2 hard-to-fill roles
2.6% of family

ACTIVE ROLES · AVG RUNWAY

67.3d until threshold

ENGINEERING
Most HTF roles by count

23.9d
avg days open · 155 roles

3 hard-to-fill roles
1.9% of family

ACTIVE ROLES · AVG RUNWAY

67.8d until threshold

NOTE ON COUNTS

Every HTF count is below 5 — raw counts reported, not percentages. Data has the highest avg days; Product has the highest rate. All four families have runway remaining.

What this analysis can't tell you.

Single-snapshot, public-feed data. The core finding holds. These are the honest edges.

Platform sample bias	Sample leans toward companies on US-hosted ATS platforms. Some EU-hosted feeds block automated access — they are not in this dataset.
Days open ≠ time-to-fill	A role may have a strong internal candidate while still appearing open externally. Posting age is a proxy, not a guarantee of difficulty.
One snapshot can't show closure	Roles filled and reposted look like new openings. Weekly snapshots (in progress) will resolve this over time.
n≥5 minimum applies	Two companies with classifiable roles were excluded from the company chart for having fewer than 5 in-scope postings.

CORE FINDING

Company A (142.8d avg) has roles well past the 90-day mark even under conservative assumptions. The signal is real.

THE ANALYST

Tarif Hassan

People analytics professional.
Reinventing HR with AI & Analytics.

Built this analysis to understand where German tech hiring is under pressure — before the pressure shows.

Not a recruiter. Not selling anything. Open to a 20-minute conversation if this data is useful to your team.

WHAT'S NEXT

01 **Weekly snapshots**
Building a posting history to show which roles are aging — not just how old they are today.

02 **More companies**
Expanding to 40 scale-ups as platform access allows.

03 **Open to feedback**
If you work in People at a German tech company and have 20 minutes — I'd value your read on this.
